Product Description

Panasonic AC Servo Motor HC-MF23B-S24 (KXF0DX1BA00) for CM402 Tray

Product Description

The Panasonic HC-MF23B-S24 (KXF0DX1BA00) is a high-performance 200W AC servo motor designed for precision applications in SMT machines, particularly compatible with CM402 tray systems. This industrial-grade motor delivers reliable operation for automation equipment requiring accurate motion control.

Key Features

- Model: HC-MF23B-S24 (KXF0DX1BA00)
- 200W power output for efficient operation
- Designed for Panasonic CM402 tray systems
- Precision servo motor for SMT applications
- Includes integrated encoder for accurate positioning
- Compatible with various automation systems
- New in box condition with expedited availability

Compatibility & Applications

This servo motor is specifically designed for use with Panasonic CM402 machines, including TL-axis applications. It serves as a direct replacement for original equipment and is also compatible with certain Mitsubishi servo systems.
