

SMT Setting Machine 2800x2000x1800mm for PCB Tray Feeding

Our Product Introduction

for more products please visit us on smtmachine-spareparts.com

Basic Information

- Place of Origin: China
- Brand Name: GS
- Minimum Order Quantity: 1 PCS
- Price: USD+negotiable+pcs
- Packaging Details: 3000*2100*1900mm
- Delivery Time: 1-7 days
- Payment Terms: T/T
- Supply Ability: 1+pcs+per days

Product Specification

- Overall Size: 2800*2000*1800mm
- Suitable For PCB Board Size: 114*80*8MM (size Is Not Limited, Other Sizes According To Customer Requirements)
- Suitable For Tray Size: 402*353*24 (length * Width * Height) (size Is Not Limited, Other Sizes Customized According To Customer Requirements)
- Accuracy: +/-0.5mm (without Visual Positioning); +/-0.1mm (with Visual Positioning)
- Highlight: **SMT Setting machine**

Product Description

SMT Setting Machine 2800*2000*1800mm

Product Description

This automatic tray equipment is a multi-axis servo system developed for multi-tray feeding systems in the SMT industry. Designed for automatic placement machines, detection machines, and dispensing machines, it features advanced automation capabilities for efficient production workflows.

Primary Applications

The setting machine provides automatic tray switching, feeding, and recovery functions. It is also suitable for various processing machines including CNC lathes, grinding machines, drilling machines, and milling machines that require automated loading/unloading systems.

Key Features

- Electrostatic removal device at entrance reduces bad patches and electrostatic damage during mounting
- Counting function and numerical control speed display
- PCBA turn-over function with 180° rotation capability on loading platform
- Scanning code functionality with MES/ERP system integration
- NG board storage capacity for multiple boards
- AGV interface for automated guided vehicle connectivity
- Rotary TRAY tray system for continuous manipulator operation
- 4-station rotating magazine with 160 blister disk capacity (402*353*24mm)
- Universal adjustable vacuum suction for compatibility with various product sizes
- Modular design with full closed-loop control for high reliability
