Product Description

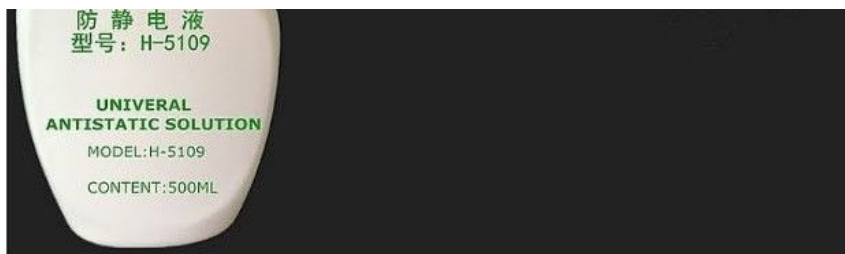

Product performance

- 1, anti-static effect is good, easy to use, easy to store.
 - 2, after the antistatic liquid is coated on the surface of the object, the formation of an extremely thin transparent film, providing durable and efficient electrostatic dissipation function, can effectively eliminate the accumulation of static electricity generated by friction, prevent electrostatic interference and dust adhesion phenomenon, and is still effective when the humidity is less than 20%. The anti-static properties can last from one month to several months depending on the use. Non-toxic, non-combustible, pollution-free, safe to use.
 - 3, the antistatic liquid is suitable for electrical appliances, instrument desktops, countertops, plastic products, packaging products, storage boxes, pallets, blankets, fabrics and other surfaces that have electrostatic control requirements.
- Applications include the elimination of static electricity from low abrasive and smooth surfaces of various plastic materials. At the same time, it can eliminate the problem of vacuuming on the surface of the object, eliminate the fault of the computer caused by static electricity, copy and printer paper jam. In the SMT industry can reduce the PCB welding rate.
