

State-of-the-Art DS3000 X-Ray Counting Machine for Precise Electronic Component Inspection

Our Product Introduction

for more products please visit us on smtmachine-spareparts.com

Basic Information

- Place of Origin: China
- Brand Name: GS
- Model Number: DS3000
- Minimum Order Quantity: 1PCS
- Price: USD+negotiable+pcs
- Packaging Details: 1000*1600*2000mm
- Delivery Time: 5-15 days
- Payment Terms: T/T
- Supply Ability: 1+pcs+per days

Product Specification

- The Alarm Way: Sound And Light Alarm
- Weight: About 730Kg
- Source: 220V/50Hz
- Aggregate Capacity: 800W
- Equipment Size: 878mm(L) * 1480mm(W) * 1895mm(H)
- X-ray Leakage Dose: <1 μ Sv/h
- Highlight: **Electronic Component X-Ray Counting Machine , Precise X-Ray Counting Machine**

Product Description

Electronic Components X-Ray Counting Machine DS3000

The X-ray source adopts Shanghai Keyiwei side window X-ray tube, which has long service life and is maintenance-free. The flat panel detector uses a 17-inch ultra-clear screen for fast imaging and no distortion. Four 7-inch material trays or one 13-15 inch material tray can be counted simultaneously. Greatly reduce the counting time, eliminate excess manpower, and can instead assist other personnel to collect or change the line, shorten the stop time of line change. The dispenser uses digital data and can print barcode stickers or upload them directly to the database. The machine can greatly improve the lack of materials, missing materials, missing materials, and less materials, digital management of material storage, reduce the cost of material inventory, and improve the accuracy of material inventory. No need to open the packaging bag, maintain the integrity of the material roll, will not affect the moisture resistance of the material.

Cloud database

Each device can be connected to our cloud database, the data and pictures of the device are uploaded to the cloud, and the device will automatically download the latest database from the cloud. Engineers will also optimize the algorithm based on the pictures and data collected by each device in the background, and regularly update it to the database for customers to use. Equipment parameter

Speed and accuracy

Up to now, the point time and accuracy of each foot material are as follows. With the upgrading of our algorithms, the database is more and more rich, and the data will be faster and faster, and the accuracy will be higher and higher.
