

FUJI NXT H04S Head for SMT Placement Machines

Our Product Introduction

for more products please visit us on smtmachine-spareparts.com

Basic Information

- Place of Origin: Japan
- Brand Name: FUJI
- Minimum Order Quantity: 1 PCS
- Price: USD+negotiable+pcs
- Packaging Details: 600*350*360mm
- Delivery Time: 1-7 days
- Payment Terms: T/T
- Supply Ability: 1+pcs+per days

Product Specification

- Brand Name: FUJI
- Product Name: NXT H04S Head
- Model Number 1: 2UGKHE000127
- Model Number 2: 2UGKHE000106
- Model Number 3: 2UGKHE000105
- Condition: Original New/Used Original
- Highlight: 2UGKHE000127 Fuji NXT H04S Head,
2UGKHE000106 Fuji NXT H04S Head,
2UGKHE000105 Fuji NXT H04S Head

Product Description

FUJI NXT H04S Head 2UGKHE000127 2UGKHE000106 2UGKHE000105

Attribute	Value
Brand Name	FUJI
Product Name	NXT H04S Head
Model Number 1	2UGKHE000127
Model Number 2	2UGKHE000106
Model Number 3	2UGKHE000105
Condition	Original New/Used Original

FUJI H04S HEAD: High-Precision Placement for Compact SMT Components

The FUJI H04S HEAD is a specialized placement head designed for FUJI's NXT series of SMT (Surface Mount Technology) placement machines. The H04S HEAD excels in handling smaller components with high precision.

Key Features and Capabilities

The FUJI H04S HEAD is engineered to handle compact components. It is a four-nozzle head, increasing efficiency in component placement. It can handle components ranging from 1608 (0603") to 38 x 38 mm in size with a height up to 6.5 mm.

Precision and Accuracy

The NXT III has achieved a placing accuracy for small chip parts of +/- 0.025 mm. The FUJI H04S HEAD is built to ensure the proper functioning of electronic circuits. FUJI conducts tests to ensure the accuracy of its placement.

Throughput and Speed

The FUJI H04S HEAD is built for efficient throughput. The new H24G high-speed head achieves 37,500 cph (chips per hour).

Component Handling

Designed to handle a diverse array of components, the FUJI H04S HEAD supports parts supplied via tape, trays, and stick feeders. This flexibility makes it suitable for various production needs.

SMT Spare Parts and Maintenance

To maintain the FUJI H04S HEAD in optimal condition, regular maintenance is essential. Maintenance includes cleaning and replacement of worn components to ensure consistent performance and prolong the lifespan of the head.

Applications

- High-mix production: Adapting to frequent product changes with its flexible design
- Standard SMT components: Handling a broad range of standard components with precision
- Various SMT lines: Meeting diverse production requirements with its versatile design

Advantages of the FUJI H04S HEAD

- Versatility: Compatible with a wide range of component sizes and shapes
- Accuracy: Delivers precise placement, crucial for high-quality assembly
- Reliability: Built to FUJI's standards, ensuring consistent performance and longevity

Frequently Asked Questions

Q1: What is the primary advantage of the FUJI H04S HEAD?

A: The primary advantage is its versatility in handling a wide range of component sizes and shapes.

Q2: What kind of accuracy can be expected from the FUJI H04S HEAD?

A: The FUJI H04S HEAD is built to ensure the proper functioning of electronic circuits.

Q3: What types of machines are compatible with the FUJI H04S HEAD?

A: The FUJI H04S HEAD is primarily designed for use with FUJI NXT series placement machines.

Q4: What range of component sizes can the FUJI H04S HEAD handle?

A: The FUJI H04S HEAD can handle components ranging from 1608 (0603") to 38 x 38 mm.

Q5: What is the H04 Nozzle for the Fuji NXT?

A: The Fuji NXT H04 Nozzle 7.00mm, with 19.00mm disc.
