

KY8030-2 3D Solder Paste Inspection Machine 22KW

Our Product Introduction

for more products please visit us on smtmachine-spareparts.com

Basic Information

- Place of Origin: KOREA
- Brand Name: KOH YOUNG
- Model Number: KY8030-2
- Minimum Order Quantity: 1 PCS
- Price: USD+negotiable+pcs
- Packaging Details: 1600*1500*1450mm
- Delivery Time: 1-7 days
- Payment Terms: T/T
- Supply Ability: 1+pcs+per days

Product Specification

- Product Name: 3D Solder Paste Inspection Machine
- Model Name: KY8030-2
- SERIAL Number: SS-SX-00121
- Voltage/Current: 220Vac 50/60Hz /5A
- SCCR: 10KA/220Vac
- Pneumatic Power: 0.4-05Mpa
- Capacity: 22KW
- Manufacture Date: 2016.03
- Highlight: 3D Solder Paste Inspection Machine,
KY8030-2 Solder Paste Inspection Machine

Product Description

KY8030-2 3D Solder Paste Inspection Machine

Product Specifications

Attribute	Value
Product Name	3D Solder Paste Inspection Machine
Model Name	KY8030-2
SERIAL Number	SS-SX-00121
Voltage/Current	220Vac 50/60Hz /5A
SCCR	10KA/220Vac
Pneumatic Power	0.4-05Mpa
Capacity	22KW
Manufacture Date	2016.03

Closed Loop Real Time Screen Printer Communication

Real-time communication of printing process monitoring data with screen printers

Result reporting after optimization by Koh Young's SPC software

Real-time communication of pick-and-place process monitoring data with mounters

Supports process optimization by controlling panels containing defects

SPC Plus Printing Process Optimization Tool

Review, diagnosis and optimization of printing, pick-and-place and reflow processes

3D data based SPI-AOI communication solution

Traces root cause of defects by storing and communicating inspection results from Koh Young's 3D SPI and 3D AOI Systems

KSMART Link Communication Solution

Provides intuitive statistical process analysis data using reliable 3D measurement data

Communicates with a wide range of production management systems
