

## Siemens 3\*8 Feeder Calibration Jig for Accurate Calibration Original Efficiency

Our Product Introduction

for more products please visit us on [smtmachine-spareparts.com](http://smtmachine-spareparts.com)

### Basic Information

- Place of Origin: Germany
- Brand Name: ASM/SIEMENS
- Model Number: 3\*8 Feeder Calibration Jig
- Minimum Order Quantity: 1 set
- Price: USD+negotiable+set
- Packaging Details: 120\*80\*90cm
- Delivery Time: 1-7 days
- Payment Terms: T/T
- Supply Ability: 1+set+per days

### Product Specification

- Brand Name: ASM/SIEMENS
- Condition: Original New/Used Original
- Lead Time: 1-7 Days
- MOQ: 1 Set
- Highlight: Siemens Feeder Calibration Jig, Accurate Feeder Calibration Jig, 3\*8 Feeder Calibration Jig

## Product Description

The Siemens 3\*8 Feeder Calibration Jig is a specialized tool used in Surface Mount Technology (SMT) assembly processes.

1. **Accuracy and Reliability:** The primary purpose of an SMT feeder calibration jig is to ensure the accuracy and reliability of component placement by calibrating SMT feeders for pick-and-place machines.
2. **Positioning Verification:** The jig provides a reference platform to verify and adjust the positioning accuracy of SMT feeders. This ensures that feeders properly align components for pick-up and placement by the pick-and-place machine.
3. **Error Minimization:** By ensuring that feeders are properly aligned and calibrated, these jigs help minimize errors and optimize the performance of pick-and-place machines in electronic manufacturing facilities.
4. **Operational Efficiency:** Calibration jigs often feature streamlined structures and high-precision components, such as 0 gap rails, which enhance operational efficiency and stability.
5. **Visual Inspection:** Many calibration jigs are equipped with high-magnification cameras (e.g., 50 times magnification) and LED lighting, allowing for precise visual inspection and adjustment of feeder alignment.
6. **Adjustment and Verification:** Users can adjust the feeder's position using digital micrometers or other adjustment mechanisms and verify the calibration using master gauges or steel tapes.
