Product Description

Panasonic P12 Electric Tape Feeder

Product highlights:

1. Compatible with the original factory feeder
 2. It can be shared with the original factory feeder
- This product uses a brushless motor, while the original factory uses a brushed DC motor. Therefore, it has a longer service life in high-load usage scenarios (such as LED advertising screens).
3. Long service life, greatly reducing the frequency of maintenance and servicing, and significantly lowering maintenance labor costs.
 4. A fine-tuning key has been added. The suction position can be calibrated on the surface mount machine without the need for a detector
 5. The suction position can be adjusted freely to conveniently achieve synchronous suction.
 6. The feeding is stable, noise-free and has a low material rejection rate.
